

Amendments to the Specification

Please replace third paragraph (lines 8-13) of page 4 with this the following amended paragraph.

“Roughly speaking about organization of this invention, like FIG 1 or FIG 3, it consists of main body (10) that ~~[[it]]~~ has ~~admitted~~-space (12) to house and to keep pets in most comfortable pose, and a bottom (15) for the pet to lie on. The bottom (15) is partitioned to a front portion (13) for the pet’s head and a rear portion (14) for the pet’s body. The bottom (15) is lowered from the front portion (13) toward the rear portion (14), and a couple of elongate shaping holders ~~form-holder~~ (20) is provided to control opening and closing of the space. The holders (20) are formed such that when the holders (20) are opened a gap (11) between the holders (20) decrements from a body front corresponding to the front portion toward a body rear corresponding to the rear portion. A length adjustable that it is set on the upside the open-part (11) of the main body (10) so it keep a frame of main body (10) and open or close the open-part (11) optionally and the shoulder strap (30) is provided to link the body front and the body rear that it join both of main body (10) so a user may wear it over his shoulder. The shaping holders (20) are outwardly flapped over to open the space (12) and inwardly flapped back to close the space (12). An extended part (23) is formed near the body front to facilitate the opening and closing of the shaping holders (20). Here, the shoulder strap (30) is sewn to the extended part (23), whereby when the pet is carried in the bag the rear portion stays closer to a user’s waist side.”
